
Gira S1 Windows Client release notes

Version: 1.4.0.154

Date: 22/08/2022

Operating systems supported: Windows 10 (32-bit and 64-bit versions)

Languages: English and German

If you are using version 1.4.0.151, please uninstall it and only use version 1.4.0.154 in the future.

New functions

- Support for the new Gira S1 firmware version 6.1.
- Support for ETS remote maintenance of KNX Secure systems.
- Adaptation of the Gira HomeServer Expert default ports.
- Minor bug fixes.

Bug fixes in 1.4.0.154

- The Gira S1 Windows Client v1.4.0.151 cannot be used in combination with the ETS5 and a Gira S1 with firmware version 5.x.
- If application programs and information of a device are downloaded several times, the client may crash.
