Gira System 55

The platform for a successful business

Gira is one of the leading brands in the field of intelligent building technology, and is a reliable partner to electricians, architects and planners. With System 55, Gira offers the ideal platform to individually and flexibly fulfil the needs of your customers.
The modular design enables a slim collection, while maintaining a wide range of programs and more attractive opportunities for variation. Inserts and frames in various colours, designs and materials are available for tailored mixing and matching to uniquely suit any property.

Whether simple, classic, or elegant, myriad décor concepts are possible thanks to the enormous number of combination options available for high-quality switch ranges and colours.

- High-quality materials: impact and shock-resistant material (thermoplastic)
- Homogeneous and easy-care surface, halogen-free and UV-resistant material, particularly resistant to signs of wear and tear.

Gira develops and produces systems and products which set standards both in technology and design. Gira products have already received a host of international design awards.

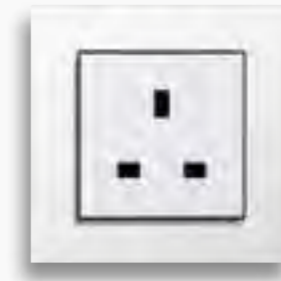

Gira System 55

The solution for all applications

Gira System 55 has over 320 functions for intelligent building technology, all of which can be installed in seven different switch ranges. It has been continuously developed since its introduction, and enhanced with new features and systems. Together, Gira's door communication and call systems constitute one of the largest selections of data connection technology worldwide, one which has also been integrated into the world of switches in terms of design and functionality.

All Gira System 55 central inserts and covers fit Gira Standard 55, E2, E3, Event, Esprit, ClassiX and E22 frames, as well as Gira Profile 55 and the modular function profile. It is possible to use an adaptor plate to ensure that all switches and functions can be used with British Standard wall boxes.
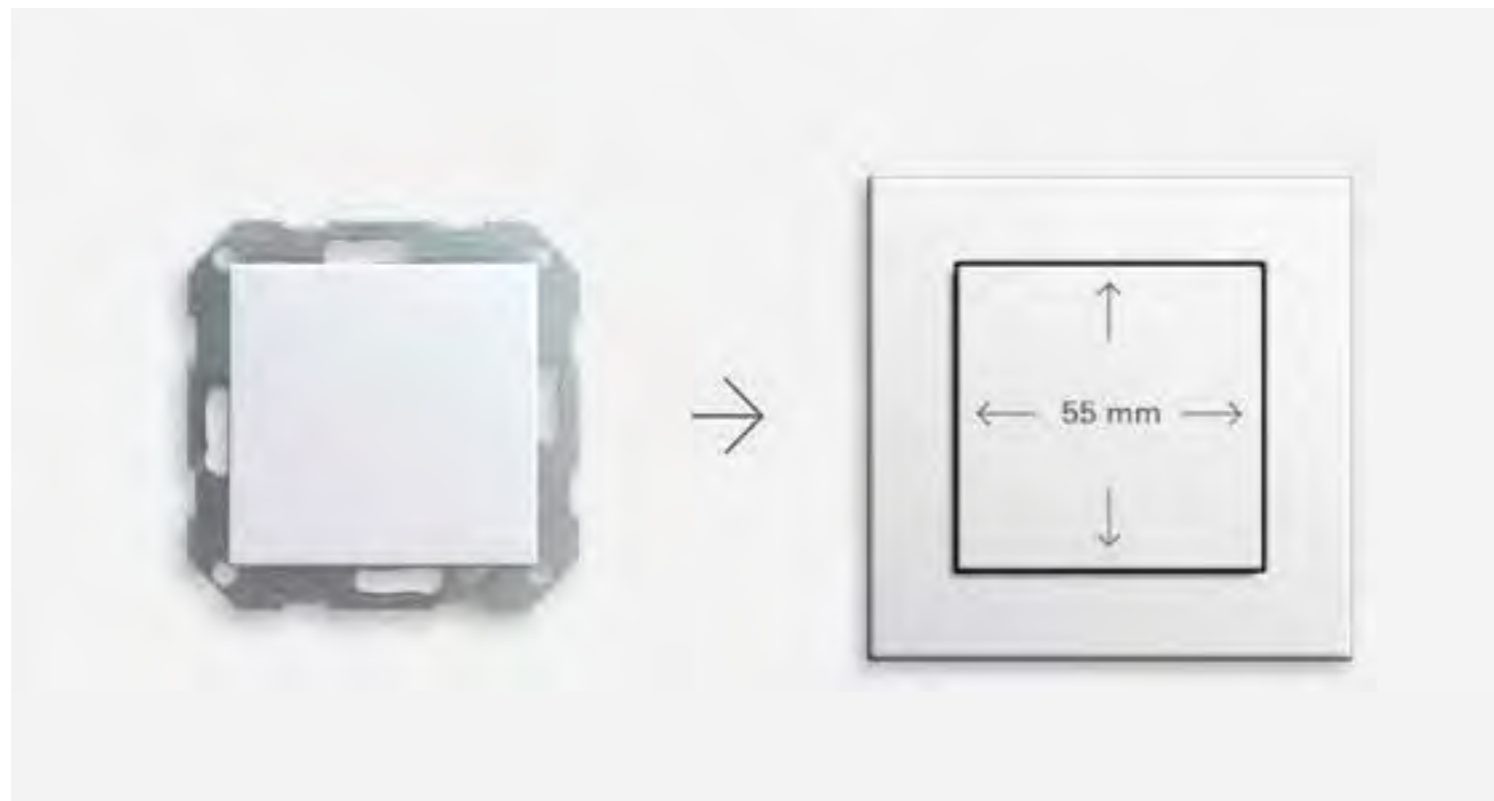

Gira British Standard installation system

Largest range, maximum diversity

Future-orientated technology and flexible solutions, combined with high-quality design: that's what intelligent building technology from Gira stands for. Automatic light control, time-dependent temperature control, distribution of music in all rooms, convenient door communication, integration of security systems and much more: the British Standard range from Gira is one of the largest available worldwide. The extensive assortment ranges from socket outlets, dimmers, rocker and push-switches to inserts for control of blinds, air-conditioning, door communication, the Gira KNX system and the eNet system.

All products of the British Standard core assortment comply with the inspection criteria for the "British Standard" from the Institute for Standardisation.

Individual selection and maximum functionality
- Award-winning design
- Adaptability to changing comfort and safety requirements for the different stages of life
- If required, upgrade investment can be staggered: for financial reasons owners start out with the Standard 55 frame, upgrading to a higher-quality frame, e.g. Gira Esprit, later on.
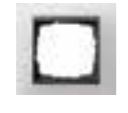

Installation in British Standard 80 mm wall box

Gira British Standard installation system

80 mm plates for square wall box

The British Standard range from Gira complies with the inspection criteria for the "British Standard" from the Institute for Standardisation.
The range features 17 functions that can be integrated into the typically square British Standard box.

- Installation in British Standard wall box
- For single and double wall boxes only
- Gira switch ranges: E3, Event, Esprit, ClassiX, E22*
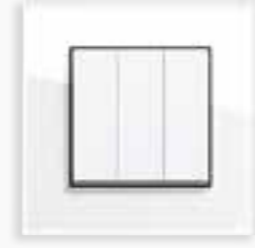

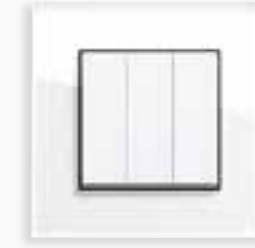

SQUARE "BRITISH STANDARD" BOX

Gira – the company

Made in Germany since 1905

Gira was founded in 1905 and is now a premium-quality manufacturer in the electrotechnical industry. Intelligent building technology from Gira stands for future-proof technology and flexible solutions, automatic light control, time-dependent temperature control, convenient door communication, integration of security systems and many other functions for more convenience, security and value. In Radevormwald, Germany, more than
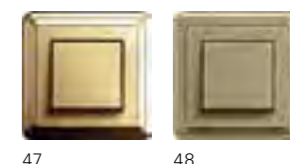

1,200 employees produce switches and socket outlets as well as system components for intelligent building technology. Using Gira design platforms, new technologies are merged with the electrical installation to become part of the Gira switch system. Offering much more than just switches, the extensive range includes include communication connections and a flush-mounted radio as well as the Gira door communication system.

Aerial view of the Gira plant premises in Radevorm-
wald, Germany.

Rooms flooded with light and open architecture
in the production building.

Innovation, transparency, communication
and design – the Gira production building
symbolises the company's philosophy.

www.catalogue.gira.com
The Gira online catalogue is clearly structured and illustrated throughout. It includes all the items of the Gira product range and enables simple creation of parts lists.

www.marking.gira.com
With the Gira Inscription Service, you can professionally design call buttons for Gira door stations, LED signal lamps, orientation plates and push-button sensors.

www.designconfigurator.gira.com
Use the Gira Design Configurator to combine frame variants from Gira switch ranges with selected functions.

www.gira.com/download
Operating instructions, software, advertising materials and more are available in the download area.

www.giraacademy.co.uk
In addition to face-to-face seminars, the Gira Academy also offers online seminars and distance-learning courses.

All the UK face-to-face seminars and training sessions can be booked easily and conveniently. Places are always limited to ensure the best learning environment can be provided for all participants.
