

Gira G1 XS – Release Notes

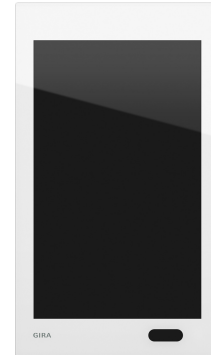

Item no.: 2073 ..

Firmware version: 3.6.4

Date: 24/09/2026

Gira Project Assistant (GPA) version: 6.1 or newer

We recommend that you always use the latest available GPA version.

1. Note

Version 3.6.4 introduces a compatibility mode for the Gira G1 XS. This enables operation with Gira One and Gira X1 servers from version 4.0. The new version of the Gira G1 XS does not include any functional upgrades.

The new functions of the servers from version 4.0 onwards are only supported by the Gira G1 (2nd generation). A list of supported and unsupported functions is provided in the form of a compatibility list in the GPA help.

2. Function and area of application

Supported Gira G1 XS functions

- Can be used as a Gira X1 or Gira One server client
- Can also be used as a room operating device via ETS start-up.
- Door communication can be integrated via:
 - DCS IP gateway
 - SIP client

Unsupported Gira G1 XS functions:

- Gira HomeServer (HS client)
- Gira eNet
- WLAN

3. Known limitations

- The new symbols (from server version 4.0) are not displayed in the Gira G1 XS.
- Synchronisation issues with Philips Hue. Changes are only applied after a restart.
- Update problems within a GPA project. Update only possible without project assignment or on the device website.
