

Gira G1 (2nd gen.) – Release Notes

Order no.: 2066 .., 2087 ..

Firmware version: 1.1.29

Date: 04/03/2026

Gira Project Assistant (GPA) version: 6.0 or newer

We recommend that you always use the latest available GPA version.

1. Scope and compatibility

App version: 5.1.91

Selectable operating modes

- Room operating device – Control of functions in a single room
- Central operating device – Control of functions throughout the building
- User-specific – Personal configuration possible

Supported systems

- Gira X1 from version 3.0.52
- Gira One server from version 3.0.53
- Gira HomeServer from version 4.13.0.250731
- DCS IP gateway from version 06.02.00.00
- Third-party SIP door communication
- Gira IP door communication
 - Mobile forwarding via G1 is possible (a DCS mobile app subscription option is required)

2. Errors rectified

- Setting the starting room:
The selected starting room in the interface remains stored even after a loss of voltage.
- WLAN channel switching:
Optimisation of switching the frequency of the WLAN connection.
- Optimisation of runtime behaviour:
Interface freezes that led to a restart have been fixed.

3. Known limitations

- DCS IP gateway:
No automatic reconnection if the IP address is changed, even when auto-discovery is active
- Delayed restart:
This can occur if the restart takes place shortly after a door call via the DCS IP gateway
